"It is the thesis of this paper that the rehabilitation worker needs the skills of a social case worker."

The contribution to rehabilitation of various specialists - medical, psychiatric, psychological, educational, and occupational - is outlined, and their qualifications as rehabilitation case workers are discussed. The authors propose as immediate objectives that a qualified social case worker be used in each state as case-work supervisor, and that the minimum standard for rehabilitation case workers be set at two quarters' or one semester's work in an accredited school of social work.
